

ORIEB ALZYUOT

Senior Front-End and Mid Full-Stack Developer

alzuotorieb9999@gmail.com | +962 77585 3203 | Amman, Jordan | [linkedin.com/in/orieb-alzyuot996](https://www.linkedin.com/in/orieb-alzyuot996)

Work Availability: Relocation | Remote | Full-Time | Part-Time | Per-Project/Freelance

PROFESSIONAL SUMMARY

Senior Front-End and Mid Full-Stack Web Developer with 6+ years of experience capable of taking complete ownership of end-to-end front-end projects, architectures, and UI/UX implementations using Angular, React, and React Native. Proficient in Node.js, Express, and SQL databases (PostgreSQL, MongoDB) for building scalable APIs and full-stack services, with added expertise in .NET Core and Microsoft Azure. Available for Full-Time, Part-Time, Contract, or Per-Project roles with full flexibility for Remote work or Relocation.

CORE SKILLS & TECHNICAL COMPETENCIES

- **Frameworks & Web:** Angular (Expert - all versions), React.js, React Native, Next.js, Node.js, Express.js
- **Languages:** TypeScript, JavaScript, SQL, C#, Python, HTML5, CSS3
- **Cloud & Infrastructure:** Microsoft Azure
- **Databases & APIs:** PostgreSQL, MongoDB, RESTful APIs, Microservices Data Flows
- **Tools, Design & AI:** Git, Docker, Agile/Scrum (Jira), Cursor, Claude, Figma, Adobe XD, Unit Testing, CI/CD, Code Reviews

PROFESSIONAL EXPERIENCE

Senior Front-End and Mid Full-Stack Developer — Saudi Azm (Azm Digital)

Nov 2023 – Present / Remote

- Lead end-to-end front-end architecture and development for complex, large-scale enterprise web and mobile applications, seamlessly integrating UI/UX designs from Figma and Adobe XD.
- Spearhead the migration and upgrade of legacy enterprise applications to the latest Angular releases (v21/v22), leveraging modern features like Signals to ensure optimal performance and long-term maintainability.
- **Implemented Docker containerization for front-end projects, streamlining local development environments and ensuring consistency across CI/CD pipelines.**
- Build, maintain, and scale robust backend microservices using **.NET Core**, deploying and managing enterprise architectures on Microsoft Azure.
- Design, implement, and optimize RESTful APIs, Node.js backend microservices, and SQL/PostgreSQL database integrations to handle heavy data transactions.
- Build cross-platform mobile features with React Native, sharing business logic across web and mobile codebases.
- Participate in technical reviews and sprint planning to deliver scalable full-stack features on time, utilizing Jira for Agile workflows and Claude/Cursor for AI-assisted development cycles.

Front-End Web Developer — Tahaluf AI Emarat Technical Solutions

Jun 2023 – Nov 2023 / Amman, Jordan

- Developed key modules for low-code/no-code business automation platforms using Angular 16 and PrimeNG.
- Optimized application performance and resolved UI integration bugs, reducing application load times.

Front-End Web Developer — Shepherd Technologies

Nov 2021 – Jun 2023 | Amman, Jordan

- Developed responsive SPAs for Human Capital Management suites (Payroll & Performance modules) using Angular and REST APIs.
- Refactored legacy front-end codebases to improve maintainability and system performance.

Full-Stack Web Developer — PenguinIN

Nov 2020 – Nov 2021 | Amman, Jordan

- Built indoor navigation CMS products using Node.js, React, OpenLayers, and PostgreSQL backend services.

EDUCATION & CERTIFICATIONS

B.Sc. Communication & Software Engineering — Al-Balqa Applied University

2014 – 2018

GPA: 3.58/4.00, Ranked 2nd in Class
